A. Repeat the phrase more often
B. Add an unrelated quotation
C. Replace the assertion with verifiable evidence and reasoning
D. Remove the claim

99. Which order makes an argument easiest to follow?

A. List objections without stating a position
B. Introduce the claim, develop reasons with evidence, address objections, conclude
C. Put every source in the opening sentence
D. Begin with the conclusion, then add random facts

100. Which sentence best links a piece of evidence to the claim that school buses should reduce idling?

A. The report has many pages.
B. This finding suggests that reducing idling could limit unnecessary exhaust near students.
C. Students also study mathematics.
D. The bus is large and yellow.

HARD QUESTIONS (101–150)

Planning and Organizing Writing

101. A writer must explain both the causes and effects of a local traffic problem. Which structure best fits the task?

A. Cause-and-effect organization
B. A list of unrelated observations
C. A character map
D. Alphabetical order

102. An essay compares online and in-person learning. Which plan will make the comparison easiest to follow?

A. List facts in the order they were found
B. Discuss each mode with no shared criteria
C. Describe only the writer's favorite mode
D. Compare both modes using the same criteria

103. A draft repeats the same evidence in three sections. What is the best planning revision?

A. Delete every supporting detail
B. Keep all repetitions to increase length
C. Assign distinct evidence to each reason
D. Move all evidence into the title

104. Which planning choice best suits an audience unfamiliar with renewable energy?

A. Begin with unexplained technical terms
B. Assume the audience knows every acronym
C. Define key concepts before developing the argument
D. Omit background information

105. A writer has more evidence than the essay can reasonably include. What should guide selection?

A. Which facts were collected first
B. Which facts are most relevant and convincing
C. Which facts sound most dramatic
D. Which facts have the most words

Claims, Reasons, and Evidence

106. A study finds a link between exercise and better mood. Which conclusion is most careful?

A. Exercise may be associated with improved mood
B. Exercise always cures every mood problem
C. The study proves exercise causes every result
D. Mood has no relationship to anything

107. A writer's evidence supports only part of a broad claim. What is the strongest revision?

A. Add an unsupported absolute statement
B. Remove all evidence
C. Keep the broad claim and hide the limits
D. Narrow the claim to match the evidence

108. Two credible sources report different figures using different methods. What should the writer do?

A. Assume both sources are useless
B. Choose the larger figure automatically
C. Combine the figures without explanation
D. Compare methods, dates, and definitions before interpreting them

109. Which evidence most strongly supports a claim about a long-term trend?

A. One person's guess
B. A slogan repeated many times
C. Comparable data collected across several years
D. A single unverified post

110. A writer uses a statistic but does not explain its relevance. What is the most important addition?

A. A second title
B. Reasoning that connects the statistic to the claim
C. A longer introduction about the writer
D. An unrelated quotation

Counterclaims and Rebuttals

111. A counterclaim raises a valid concern about cost. Which rebuttal is most credible?

A. A phased plan with a budget estimate could address the cost concern
B. The concern should not be mentioned
C. The project will cost nothing, without any estimate
D. Only foolish people care about cost

112. What is the fairest way to present an opposing position?

A. Describe it accurately before responding
B. Attribute it to people who never held it
C. Make it sound ridiculous
D. Leave out its strongest point

113. A rebuttal answers an opposing view with an unrelated statistic. What should the writer do?

A. Replace the rebuttal with a title
B. Keep the statistic because all numbers persuade
C. Remove the original claim
D. Use evidence that directly addresses the objection

114. Which argument best acknowledges a limitation while defending the claim?

A. Anyone who questions the plan is wrong.
B. The plan has no limitations of any kind.
C. Although the plan requires staff time, a short trial can measure whether the benefits justify the cost.
D. There is no need to test the plan.

115. A counterclaim is stronger than the writer expected. What is the most intellectually honest response?

A. Repeat the claim more loudly
B. Revise the claim or qualify it in light of the evidence
C. Ignore the evidence
D. Attack the person who raised it

Paragraph Development and Transitions

116. A paragraph has several examples but its central idea remains unclear. What revision is most useful?

A. Replace every example with a question
B. State a precise controlling idea and connect examples to it
C. Move all examples to the title
D. Add more examples without explanation

117. Which transition best signals a concession before the writer's response?

A. Admittedly
B. For example
C. Likewise
D. Consequently

118. A writer wants to show that a new policy had an unintended consequence. Which transition fits best?

A. In the same way
B. For instance
C. Similarly
D. Unexpectedly

119. Which paragraph structure best develops a point using a claim, evidence, explanation, and link to the next idea?

A. A list of facts in random order
B. A paragraph of questions only
C. A focused sequence with clear logical connections
D. A series of unrelated quotations

120. The same transition appears at the start of every paragraph. What is the best stylistic revision?

A. Remove all logical connections
B. Use the longest transition every time
C. Vary transitions according to each relationship
D. Repeat each paragraph twice

Sentence Combining and Variety

121. Which sentence has the clearest parallel structure?

A. The club plans collecting food, to deliver supplies, and shelters.
B. The club plans to collect food, deliver supplies, and visit shelters.
C. The club plans to collect food, supplies will be delivered, and visiting shelters.
D. The club plans food collection, delivering, and to visit shelters.

A. Only technical definitions
B. An impersonal instruction manual tone
C. A list of statistics with no reflection
D. Specific details that reveal the narrator's thoughts and growth

130. An audience already understands the basics of a topic. How should the writer adapt?

A. Use unrelated background details
B. Explain every familiar term repeatedly
C. Build on shared knowledge and focus on deeper implications
D. Remove all analysis

Research, Sources, and Paraphrasing

131. A source is written by an expert but is sponsored by an organization with a clear interest in the outcome. What should the writer do?

A. Use only the sponsor's summary
B. Consider potential bias and compare the claims with independent evidence
C. Reject the source without reading it
D. Assume expertise makes bias impossible

132. A paraphrase accurately conveys a source's idea but includes no citation. What is the problem?

A. The idea becomes the writer's automatically
B. The source still needs credit even when wording changes
C. Paraphrases never need citations
D. Only direct quotations require source details

133. Which research strategy best reduces confirmation bias?

A. Search for credible evidence that challenges as well as supports the initial view
B. Choose the first result and stop
C. Ignore findings that complicate the argument
D. Read only sources that agree with the claim

134. A source makes a dramatic claim but provides no data or traceable references. What is the most responsible choice?

A. Add an invented citation
B. Present it as established fact
C. Repeat it because it is memorable
D. Seek corroboration from reliable sources before using the claim

135. When is a direct quotation most useful?

A. When the source is unrelated
B. When a quotation can replace the entire essay
C. When the source's exact wording is important to the analysis
D. Whenever a writer wants to avoid explaining an idea

Editing, Revising, and Strengthening Drafts

136. A draft contains strong ideas but the thesis promises more than the essay delivers. What revision is most effective?

A. Replace the thesis with a joke
B. Remove all body paragraphs
C. Revise the thesis to match the actual argument or develop the missing sections
D. Keep the mismatch to sound ambitious

137. Which editing strategy is most likely to catch repeated errors in a final draft?

A. Read only the title
B. Review one type of error at a time, then reread for meaning
C. Change punctuation randomly
D. Assume a spell-checker catches every problem

138. A peer suggests a change that improves style but weakens the meaning. What should the writer do?

A. Keep the original or find another revision that preserves meaning
B. Add the suggestion and ignore its effect
C. Remove the sentence without considering purpose
D. Accept every suggestion automatically

139. A paragraph's evidence is relevant but outdated. What is the best revision?

A. Keep it because relevance makes date unimportant
B. Change the date without checking the source
C. Delete the claim and all reasoning
D. Replace or supplement it with current, credible evidence where available

140. Which final review best checks whether an argument is persuasive?

A. Count adjectives only
B. Check whether the title is the longest line
C. Review spelling but ignore logic
D. Check claim, evidence, reasoning, counterclaim, organization, and clarity

Narrative and Descriptive Writing

141. A narrator describes an event but misunderstands another character's motives. What effect can this create?

A. The setting disappears
B. The story must have no conflict
C. Readers may recognize a gap between the narrator's view and the situation
D. The narrator becomes the author in every case

142. Which revision best creates a consistent mood of suspense?

A. The narrator listed the room's measurements.
B. The hallway lights flickered as slow footsteps approached the locked door.
C. Everyone felt many emotions at once.
D. The hallway was a hallway with lights.

143. A personal narrative describes a challenge but never explains its significance. What should be added?

A. Reflection showing what the experience changed or taught the narrator
B. A new conflict in the final sentence
C. A definition of narrative writing
D. A list of unrelated facts

144. Which technique best reveals a character's change over the course of a story?

A. Show contrasting choices or actions at key points
B. Repeat the same description without development
C. Explain every event in a glossary
D. Remove the character's decisions

145. A descriptive paragraph uses many adjectives but feels vague. What revision is strongest?

A. Repeat the same description in every sentence
B. Remove all concrete nouns
C. Add even more general adjectives
D. Replace general adjectives with precise sensory details and purposeful images

Argumentative Writing Practice

146. A proposal claims a program will save money but gives no cost estimates. What should the writer add?

A. A more emotional slogan

B. A longer list of unrelated benefits
C. A transparent comparison of expected costs and savings
D. A claim that estimates are unnecessary

147. Which conclusion best strengthens an argument without merely repeating the thesis?

A. Introduce a new unsupported statistic
B. Connect the main evidence to a practical next step for the audience
C. Add a completely unrelated topic
D. Repeat the first sentence word for word

148. A writer wants readers to support a policy but evidence shows it helps only some groups. What is the most responsible approach?

A. Hide the evidence that complicates the claim
B. Explain who benefits, acknowledge limits, and propose adjustments if needed
C. Use an emotional story as the only proof
D. Claim that everyone benefits equally

149. Which feature most clearly distinguishes a strong argument from a one-sided opinion?

A. It addresses opposing views and supports its reasoning with credible evidence
B. It avoids all qualifications
C. It repeats the same view without explanation
D. It uses the most exclamation marks

150. An essay has strong evidence but the audience is unlikely to care about the issue. What could most improve its persuasiveness?

A. Remove the introduction
B. Make the evidence harder to understand
C. Add technical terms without definitions
D. Explain how the issue connects to the audience's needs and priorities
